

WHITE on LIGHT... a lower density substrate

Name:	White on Light ... this is a White melamine product manufactured on a NZ made low density MDF
Size:	2440 x 1220
Thickness:	16 & 18mm only (at this stage)
Finishes:	Gloss, Natural & Pearl (Pearl in 18mm only)
Colour:	White only at this stage
Density:	600 kg/m ³ (approx. 18% less than 730 kg/m ³ standard board)
Handling/ Using:	Due to the lower density, the product should be stored horizontally with good support to prevent potential sagging. Screw holding ability and cutting should be as per our standard density product
Weight:	Approx . 28.57 kg for 16mm Approx. 32.15 kg for 18mm Note: There is a 'plus or minus' in density on all of the board we produce of potentially 5%
Recommended uses:	As a consequence of the lower density MDF, imperfections in the surface finish may be apparent. Daiken Southland recommends White on Light as a carcass or wardrobe product. White on Light is not recommend to be used for door/ cupboard facings.
