## Seal-A-Gap

Probond Seal-A-Gap is ideal for sealing interior wall joints and any joint not exposed to weather or pooling of water. As well as perimeter caulking of windows and doors, and for concrete, and masonry block work.

It can also be used as an adhesive for cornices.

White

## Probond Hi-Tack

Probond HI-TACK is a single component MS Polymer adhesive designed for high/ instant grab. Probond Hi-Tack has a high initial green strength making it a universal product for bonding materials in a horizontal and vertical application where mechanical fixings are not desirable.

## Liquid Bond

Probond Liquid Bond is a high strength contact adhesive that will not slump on vertical surfaces. It can be used either as a one way liquid adhesive, or a two way contact adhesive. It offers adhesion to most common surfaces.

## Prosil 10

Prosil 10 is a professional quality 100% Neutral Cure Silicone designed for general purpose glazing, industrial fabrication, manufacturing, potable water and automotive sealing applications.

Prosil 10 has excellent adhesion to most common building materials as well as excellent UV resistance.

## Prosil 20

Prosil 20 silicone sealant is designed for general purpose glazing and sealing applications where long term reliability is required.

It can also be used in the manufacturing of aquariums, and has superior chemical, and temperature performance compared to neutral silicones.

## Prosil 30

Prosil 30 is designed to give superior adhesion and durability in a wide range of glazing, weather sealing, and trade applications.

It has been specifically formulated for professional glazing.

Weathering and UV resistance is excellent and its superior physical properties are retained over many years exposure.

## Prosil 41LM

Prosil 41LM is designed to give superior adhesion and durability in a wide range of glazing, weather sealing, cladding and trade applications.

Prosil 41LM is a low modulus silicone making it perfect for cladding applications and external expansion joints where high movement and UV stability is required.

Grey

## Prosil Wet Area

Prosil Wet Area N-600 is ideal for sealing in bathrooms, kitchens, hotel wash basins, and shower screens etc.

It reacts with atmospheric moisture to produce a form in place silicone rubber seal. Weathering and UV resistance is excellent.

# Mastersil SMP 25

Mastersil SMP 25 displays excellent adhesion to many substrates common to the automotive and manufacturing sectors, such as metals, composites, thermoplastics and fiberglass.

Typically, Mastersil SMP 25 will be used as joint sealant for interior and exterior applications, however it can also be used in various applications where a semi structural, high strength and flexible bond is required due to dynamic movement.

White

# Mastersil SMP 50

Mastersil SMP 50 is specifically designed to achieve a high Shore A hardness once cured, creating a rigid, semi structural, high strength and flexible bond line between various substrates with lower dynamic movement.

With advanced chemical composition, Mastersil SMP 50 has a quicker skin time than our SMP 25 as well as a shorter tack free time. Mastersil SMP50 also offers a high level of chemical and salt water resistance.
